

## MITIGATION SEQUENCING COMPLIANCE NARRATIVE

The narrative that follows was developed to demonstrate the compliance of the South Sammamish Segment B of East Lake Sammamish Trail with the City of Sammamish mitigation sequencing hierarchy for both critical areas and shorelines. While the results described are specific to Segment B, the general approach to compliance with shoreline requirements was also applied to the development of the Inglewood Hill Road Parking Lot. Thus, the narrative is provided for reference as part of the record for the Inglewood Hill Road Parking Lot project.
