[CAUTION - EXTERNAL EMAIL]

To City of Sammamish,

I don't agree with the current EIS scope as it focuses on traffic concurrency. This Environmental Impact Study (EIS) will be used to drive changes to the comprehensive plan and land use policy which will have significant impacts on the lives of every resident of Sammamish.

- The significant lack of transparency of this process and effort is unacceptable.
- The EIS scope comments submitted were not considered or addressed.
- There has been no public deliberation by the planning commission or city council. There have been no public hearings. See WAC 197-11-535 (<https://apps.leg.wa.gov/WAC/default.aspx?cite=197-11-535>).

The scope of this EIS focuses on traffic concurrency and does not address issues of housing imbalance or sustainability and addressing greenhouse gas emissions. It also does not actually explore transit options outside of building expensive and unreasonable road projects.

I request, at a minimum, the city hold two public hearings on the Draft BLUMA EIS (DEIS) at two City Council meetings at least two weeks apart. Even more appropriate would be to have study sessions on BLUMA EIS first, then Planning Commission public hearings, then City Council public hearings addressing all comments submitted from the scoping statement and this draft document.

And a reminder: Public office is a public service. You have been chosen to work for the people. You are obligated to serve the people.
